Ser. No. 09/866,143 files May 25, 2001, Ilya KIRNOS

Examiner: Kyung H. SHIN, GAU 2143

Docket No. 50277-1734

AMENDMENTS TO THE CLAIMS

information;

This listing of claims will replace all prior versions, and listings, of claims in the application:

(original) A method for managing files, the method comprising:
 mapping information about a file system to a comparison file, the information identifying at least a first item in the file system located at a first location, the first location being identifiable by a first location

making a working version of a portion of the file system, the working version including at least a first working item that corresponds to the first item, the first working item initially being located at a second location identifiable by the first location information; and

using information in the comparison file and about the working version to subsequently determine if the first working item is located at a third location identifiable by a second location information, the second location information being different than the first location information.

- 2. (original) The method of claim 1, wherein if the first working item is located at the third location, the method includes causing the first item in the file system to move to a fourth location identifiable by the second location information.
- 3. (original) The method of claim 1, using information in the comparison file and about the working version to subsequently determine if the first working item is located at a third location identifiable by a second location information includes determining if the first working item has a new name.

Ser. No. 09/866,143 filed May 25, 2001, Ilya KIRNOS

Examiner: Kyung H. SHIN, GAU 2143

Docket No. 50277-1734

4. (original) The method of claim 3, wherein making a working version of a portion of the

file system includes recording a creation time of the first working item in the comparison file.

5. (original) The method of claim 3, wherein using information in the comparison file and

about the working version to subsequently determine if the first working item is located at a

third location identifiable by a second location information includes locating the first

working item in the working version using the creation time.

6. (original) The method of claim 1, further including signaling the file system to delete the

first item if the first working item is omitted from the working version.

7. (original) The method of claim 6, further including using the creation time of the first

working item to determine that the first working item has been deleted from the working

version.

8. (original) The method of claim 4, wherein making a working version of a portion of the

file system includes recording a modification time of the first working item in the

comparison file.

9. (original) The method of claim 1, further comprising determining if the first working

item was edited subsequent to making the working version.

10. (original) The method of claim 8, further comprising determining if the first working

item was edited subsequent to making the working version using the modification time of the

first working item.

11. (original) The method of claim 10, further comprising determining if a subsequent

modification time of the first working item is different than the recorded modification time

for the first working item.

Ser. No. 09/866,143 filed May 25, 2001, Ilya KIRNOS

Examiner: Kyung H. SHIN, GAU 2143

Docket No. 50277-1734

12. (original) A method for managing files, the method comprising:

mapping information about a file system to a comparison file;

making a working version of a portion of the file system; and

using information in the comparison file and about the working version to subsequently

determine if a first working item in the working version was once copied from a

second working item in the working version.

13. (original) The method of claim 12, further comprising causing the portion of the file

system to include the first working item after determining the first working item was once

copied from the second working item.

14. (original) The method of claim 12, wherein the second working item originates from a

first item in the portion of the file system.

15. (original) The method of claim 13, wherein the second working item is created as new

after the working version is made.

16. (original) The method of claim 13, wherein a content of the first working item is

different than a content of the second working item.

17. (original) The method of claim 14, wherein making a working version includes

recording both a creation time and a modification time in the comparison file for the second

working item.

18. (original) The method of claim 17, wherein using information in the comparison file and

about the working version to subsequently determine if a first working item in the working

version was once copied from a second working item in the working version includes

identifying a creation time and a modification time for the first working item.

Ser. No. 09/866,143 filed May 25, 2001, Ilya KIRNOS

Examiner: Kyung H. SHIN, GAU 2143

Docket No. 50277-1734

19. (original) The method of claim 18, wherein using information in the comparison file and

about the working version to subsequently determine if a first working item in the working

version was once copied from a second working item in the working version includes

detecting that the modification time of the first working item is before the creation time of

the first working item.

20. (original) The method of claim 19, wherein using information in the comparison file and

about the working version to subsequently determine if a first working item in the working

version was once copied from a second working item in the working version includes

matching the modification time of the first working item with the modification time of the

second working item.

21. (original) The method of claim 12, further comprising determining if the first working

item was edited after being copied from the second working item.

22. (original) The method of claim 12, further comprising determining that the first working

item is new if the creation time of the first working item is different than a creation time of

all of the items identified by the comparison file, and if the modification time for the first

working item is greater than or equal to creation time for the first working item.

23. (original) The method of claim 22, further comprising causing the portion of the file

system to include the first working item after determining the first working item is new.

24. (original) The method of claim 12, wherein using information in the comparison file and

about the working version to subsequently determine if a first working item in the working

version was once copied from a second working item in the working version includes

comparing a content of the first working item to a content of the second working item.

Ser. No. 09/866,143 filed May 25, 2001, Ilya KIRNOS

Examiner: Kyung H. SHIN, GAU 2143

Docket No. 50277-1734

25. (original) A method for managing files, the method comprising:

mapping information about a file system to a comparison file, the information identifying at least a first item in the file system located at a first location, the first location being

identifiable by a first location information;

making a working version of a portion of the file system, the working version including at least a first working item originating from the first item, the first working item

initially being located at a second location, the second location being identifiable by

the first location information; and

using information in the comparison file and about the working version to detect if at least one of two operations were performed on the working version, the operations including changing the first location information for the first working item, and

editing a content of the first working item.

26. (original) The method of claim 25, wherein making a working version of a portion of

the file system includes recording an initial modification time for the first working item in

the comparison file, the initial modification time recording a last instance when the first

working item was either edited or created.

27. (original) The method of claim 26, wherein detecting the operation of editing the

content of the first working item includes subsequently determining if the initial modification

time was changed.

28. (original) The method of claim 27, further comprising causing the first item of the file

system to include the edited content of the first working item.

29. (original) The method of claim 25, wherein making a working version of the file system

includes recording a creation time for the first working item.

Ser. No. 09/866,143 filed May 25, 2001, Ilya KIRNOS

Examiner: Kyung H. SHIN, GAU 2143

Docket No. 50277-1734

30. (original) The method of claim 29, wherein using information in the comparison file and

about the working version to detect if at least one of two operations were performed on the

working version includes locating the first working item in the working version using the

creation time.

31. (original) A method for managing files, the method comprising:

mapping information about a file system to a comparison file, the information identifying at

least a first item in the file system located at a first location, the first location being

identifiable by a first location information;

making a working version of a portion of the file system, the working version including at

least a first working item originating from the first item, the first working item

initially being located at a second location, the second location being identifiable by

the first location information; and

using information in the comparison file and about the working version to determine if a

compound operation was performed on the first working item, the compound

operation including at least two successive operations from a set of operations that

consist of changing the first location information for the first working item, making a

first working copy from the first working item, and editing a content of the first

working item.

32. (original) The method of claim 31, further comprising causing the portion of the file

system to incorporate changes made by operations performed on the working version so that

the first item matches the first working item.

33. (original) The method of claim 31, wherein for one of the at least two compound

operations being making a first working copy from the first working item, the method further

Examiner: Kyung H. SHIN, GAU 2143

Docket No. 50277-1734

includes determining if a selected working item in the working version was once copied from the first working item.

34-75 (cancelled)

76. (original) A computer readable medium carrying instructions for managing files, the instructions including instructions for performing the steps of:

mapping information about a file system to a comparison file, the information identifying at least a first item in the file system located at a first location, the first location being identified by a first location information;

making a working version of a portion of the file system, the working version including at least a first working item originating from the first item, the first working item initially being located at a second location by the first location information; and

using information in the comparison file and about the working version to

determine if the first working item is located at a third location identified

by a second location information, the second location information being

different than the first location information.

77. (original) The computer readable medium of claim 76, wherein if the first working item is located at the third location, the instructions of computer readable medium includes instructions for causing the first item in the file system to move to a fourth location identified by the second location information.

78. (original) The computer readable medium of claim 76, wherein the step of using information in the comparison file and about the working version to determine if the first

Examiner: Kyung H. SHIN, GAU 2143

Docket No. 50277-1734

working item is subsequently located at a third location identifiable by a second location

information includes instructions for determining if the first working item has a new name.

79. (original) The computer readable medium of claim 78, wherein the step of making a

working version of a portion of the file system includes instructions for recording a creation

time of the first working item in the comparison file.

80. (original) The computer readable medium of claim 78, wherein the step of using

information in the comparison file and about the working version to determine if the first

working item is subsequently located at a third location identifiable by a second location

information includes instructions for locating the first working item in the working version

using the creation time.

81. (original) The computer readable medium of claim 76, further including instructions for

signaling the file system to delete the first item if the first working item is omitted from the

working version.

82. (original) The computer readable medium of claim 81, further including instructions for

using the creation time of the first working item to determine that the first working item has

been deleted from the working version.

83. (original) The computer readable medium of claim 79, wherein the step of making a

working version of the file system includes instructions for recording a modification time of

the first working item in the comparison file.

84. (original) The computer readable medium of claim 76, further comprising instructions

for determining if the first working item was edited subsequent to making the working

version.

Ser. No. 09/866,143 filed May 25, 2001, Ilya KIRNOS

Examiner: Kyung H. SHIN, GAU 2143

Docket No. 50277-1734

85. (original) The computer readable medium of claim 83, further comprising instructions for determining if the first working item was edited subsequent to making the working

version using the modification time of the first working item.

86. (original) The computer readable medium of claim 85, wherein the step of using the modification time of the first working item includes instructions for determining if a subsequent modification time of the first working item is different than the recorded modification time for the first working item.

87. (original) A computer readable medium carrying instructions for managing files on different computers, the instructions including instructions for performing the steps of: mapping information about a file system to a comparison file making a working version of a portion of the file system;

using information in the comparison file and about the working version to subsequently determine if a first working item in the working version was once copied from a second working item in the working version.

88. (original) The computer readable medium of claim 87, further comprising instructions for causing the file system to include the first working item after determining the first working item was once copied from the second working item.

89. (original) The computer readable medium of claim 87, wherein the second working item originates from a first item in the file system.

90. (original) The computer readable medium of claim 88, wherein a content of the first working item is different than a content of the second working item.

Ser. No. 09/866,143 filed May 25, 2001, Ilya KIRNOS

Examiner: Kyung H. SHIN, GAU 2143

Docket No. 50277-1734

91. (original) The computer readable medium of claim 89, wherein the step of making a

working version includes instructions for recording both a creation time and a modification

time in the comparison file for the second working item.

92. (original) The computer readable medium of claim 91, wherein the step of using

information in the comparison file and about the working version to subsequently determine

if a first working item in the working version was once copied from a second working item in

the working version includes instructions for identifying a creation time and a modification

time for the first working item.

93. (original) The computer readable medium of claim 92, wherein the step of using

information in the comparison file and about the working version to subsequently determine

if a first working item in the working version was once copied from a second working item in

the working version includes instructions for detecting that the modification time of the first

working item is before the creation time of the first working item.

94. (original) The computer readable medium of claim 93, wherein the step of using

information in the comparison file and about the working version to subsequently determine

if a first working item in the working version was once copied from a second working item in

the working version includes instructions for matching the modification time of the first

working item with the modification time of the second working item.

95. (original) The computer readable medium of claim 89, further comprising instructions

for performing the steps of determining if the first working item was edited after being

copied from the second working item.

96. (original) The computer readable medium of claim 87, further comprising instructions

for performing the steps of determining that the first working item is a new file if the creation

Docket No. 50277-1734

time of the first working item is different than a creation time of all of the items identified by

the comparison file, and if the modification time for the first working item is greater than or

equal to the creation time for the first working item.

97. (original) The computer readable medium of claim 96, further comprising instructions

for performing the step of causing the file system to include the first working item after

determining the first working item is new.

98. (original) The computer readable medium of claim 82, wherein the step of using

information in the comparison file and about the working version to subsequently determine

if a first working item in the working version was once copied from a second working item in

the working version includes instructions for comparing a content of the first working item to

a content of the second working item

99. (original) A computer readable medium for managing files, the computer readable

medium carrying instructions including instructions for performing the steps of:

mapping information about a file system to a comparison file, the information identifying at

least a first item in the file system located at a first location, the first location being

identified by a first location information;

making a working version of a portion of the file system, the working version including at

least a first working item originating from the first item, the first working item

initially being located at a second location, the second location being identified by

the first location information; and

using information in the comparison file and about the working version to detect if at least

one of two operations were performed on the working version, the operations

including changing the first location information for the first working item, and

editing a content of the first working item.

Ser. No. 09/866,143 filed May 25, 2001, Ilya KIRNOS

Examiner: Kyung H. SHIN, GAU 2143

Docket No. 50277-1734

100. (original) The computer readable medium of claim 99, wherein the step of making a

working version of a portion of the file system includes instructions for recording an

initial modification time for the first working item in the comparison file, the initial

modification time recording a last instance when the first working item was edited or

created.

101. (original) The computer readable medium of claim 100, wherein the step of using

information in the comparison file and about the working version to detect if at least one

of two operations were performed on the working version includes instructions for

subsequently determining if the initial modification time was changed.

102. (original) The computer readable medium of claim 101, further comprising

instructions for performing the step of causing the file system to include the edited

content of the first working item.

103. (original) The computer readable medium of claim 99, wherein the step of making a

working version of a portion of the file system includes instructions for recording a

creation time for the first working item.

104. (original) The computer readable medium of claim 103, wherein the step of using

information in the comparison file and about the working version to detect if at least one

of two operations were performed on the working version includes instructions for

locating the first working item in the working version using the creation time.

105. (original) A computer readable medium carrying instructions for managing files, the

instructions including instructions for performing the steps of:

Ser. No. 09/866,143 filed May 25, 2001, Ilya KIRNOS

Examiner: Kyung H. SHIN, GAU 2143

Docket No. 50277-1734

mapping information about a file system to a comparison file, the information identifying at least a first item in the file system located at a first location, the first location being identified by a first location information;

making a working version of a portion the file system, the working version including at least a first working item originating from the first item, the first working item initially being located at a second location, the second location being identified by the first location information; and

using information in the comparison file and about the working version to determine if a compound operation was performed on the first working item, the compound operation including at least two successive operations from a set of operations that consist of changing the first location information for the first working item, making a first working copy from the first working item, and editing a content of the first working item.

106. (original) The computer readable medium of claim 105, further comprising instructions for indicating which of the operations were performed on the first working item to change the first item in the file system if the compound operation is determined to have been performed.

107. (original) The computer readable medium of claim 105, wherein for one of the at least two compound operations being making a first working copy from the first working item, the computer readable medium further includes instructions for determining if a selected working item in the working version was once copied from the first working item.
